

ADDITIONAL SERVICES WE PROVIDE

Off-site data storage

- Backup information remotely.
- Good for data disaster recovery plan.
- Strong security features in place.
- 24 hour access of your data.
- Giga Byte and Tera Byte space available.
- Helps companies come into compliance with Sarbanes Oxley and HIPPA requirements.

Customized/Vanity e-mail

- Specialized e-mail domain.
- Improves virtual appearance.

Co-location

- Rent out rack space in our facility to place your equipment.
- This environment is secure and designed to keep equipment at safe operating temperatures.
- Great option for off site data storage.

DNS Hosting (Domain Name System Hosting)

- Allows companies to host their website internally, but not have to buy a server and licenses for DNS.
- DNS Hosting tells Internet traffic how to get to a website.

Wireless Hotspot

- Broadcasts Internet connection without cabling.
- Perfect for shops, restaurants, and hotels that want zero-configuration Internet access.
- Equipment provided for a low monthly fee.
- Minimal maintenance cost and no administration effort.

VPN Gateway Tunnel

- Virtual Private Network.
- A cost effective, secure way for businesses that have multiple offices linked together.
- Remote offices work on one network for easier and faster file sharing.
- Reliable and secure access.

Local Advertising

- Customized video display ad's on FiberNet Channel 4.
- Business card rolodex on FiberNet Channel 4.
- Leased access on FiberNet Channel 4.
- Weather channel crawl advertisement on channel 34.

Port Monitoring

- We can monitor certain equipment for you.
- If the equipment goes down then we would notify you.

EMAIL SETUP

Dear FiberNET Customer,

One of the most popular uses of the Internet is sending and receiving e-mail. To begin you will need to contact a FiberNET Technical Support Representative at (423) 586-4121 to have an e-mail address be created.

After your e-mail address has been created you can follow the next few steps to access your new e-mail!

1. Open your Internet Browser.

2. Go to musfiber.com and click on Web Mail
